

MEDIUM & LOW VOLTAGE DRIVES

No One Anywhere is Better at Drives Than We Are!

AC Drive Troubleshooting Seminar

May 23-24, 2023

Norcross, GA

Attention ALL AC Variable Frequency Drive Users:

One of the most **common** inquiries we get here at EMA Inc. is for training on AC Solid-State Motor Drives. Often it isn't cost effective to teach on-site schools for a small # of people. **Here is a VERY cost effective solution.**
We're offering a 2-day, intensive seminar on AC Drives. (PWM)

This Course is also approved by the **Georgia Associate of Water Professionals** for continuing education required for **GAWP Maintenance Technologist License Renewal Points**

Organization	Course Number	Course Title	CE Points
GAWP	CE-12-MT-0620-EMA-06302024-002	AC Electronic Motor Drive Seminar	12

Who should attend?

ANYONE troubleshooting, maintaining, applying or operating AC Drives. You'll leave this school with a clear & practical understanding of solid-state AC drives, motors and the mechanical/electrical interaction which takes place. You'll learn to recognize classic drive trouble symptoms and quickly resolve common problems. This seminar could easily return your investment with just one instance of reduced downtime due to your increased knowledge. An electronic background will be helpful, but not essential. We'll review the basic electrical laws and component operation you need to know.

MEDIUM & LOW VOLTAGE DRIVES

AC Drive Troubleshooting Seminar

May 23-24, 2023

Norcross, GA

Class Schedule

~ DAY ONE ~

Safety

Drive Application Basics

- *Horsepower/Torque
- *Load Types
- *Typical Applications, Pitfalls and Troubleshooting
- *Harmonics and Noise

Test Equipment and Measuring Methods

- *Component Testing
- *Voltage/Current Measuring Methods, Problems and Considerations of Non-sinusoidal Waveforms
- *Oscilloscope Basics and Safety Considerations

Discrete Components and Typical Circuits Overview

- *Passive Components (capacitors, diodes)
- *Active Components (transistors, IGBT's etc.) and Associated Circuits
- *Inductors, Transformers

~DAY TWO ~

AC Motors

- *Construction & Theory of Operation (Induction)
- *Connections & Testing
- *Maintenance

AC Drives

- *Construction & Theory of Operation (PWM)
- *Braking Types (Dynamic, DC Injection, Line Regenerative)
- *Programming

*User Interface (I/O)

*Drive, Motor, and Load Data

- *Faults & Troubleshooting
- *Visual & Test Equipment Diagnosis
- *Typical Application Problems
- *Maintenance

Space is limited. Please call or email Tatyana and reserve your seat(s) today.

(770) 448-4644
